Thabo Mofutsanyana: Clients Tested for HIV 15yrs & older

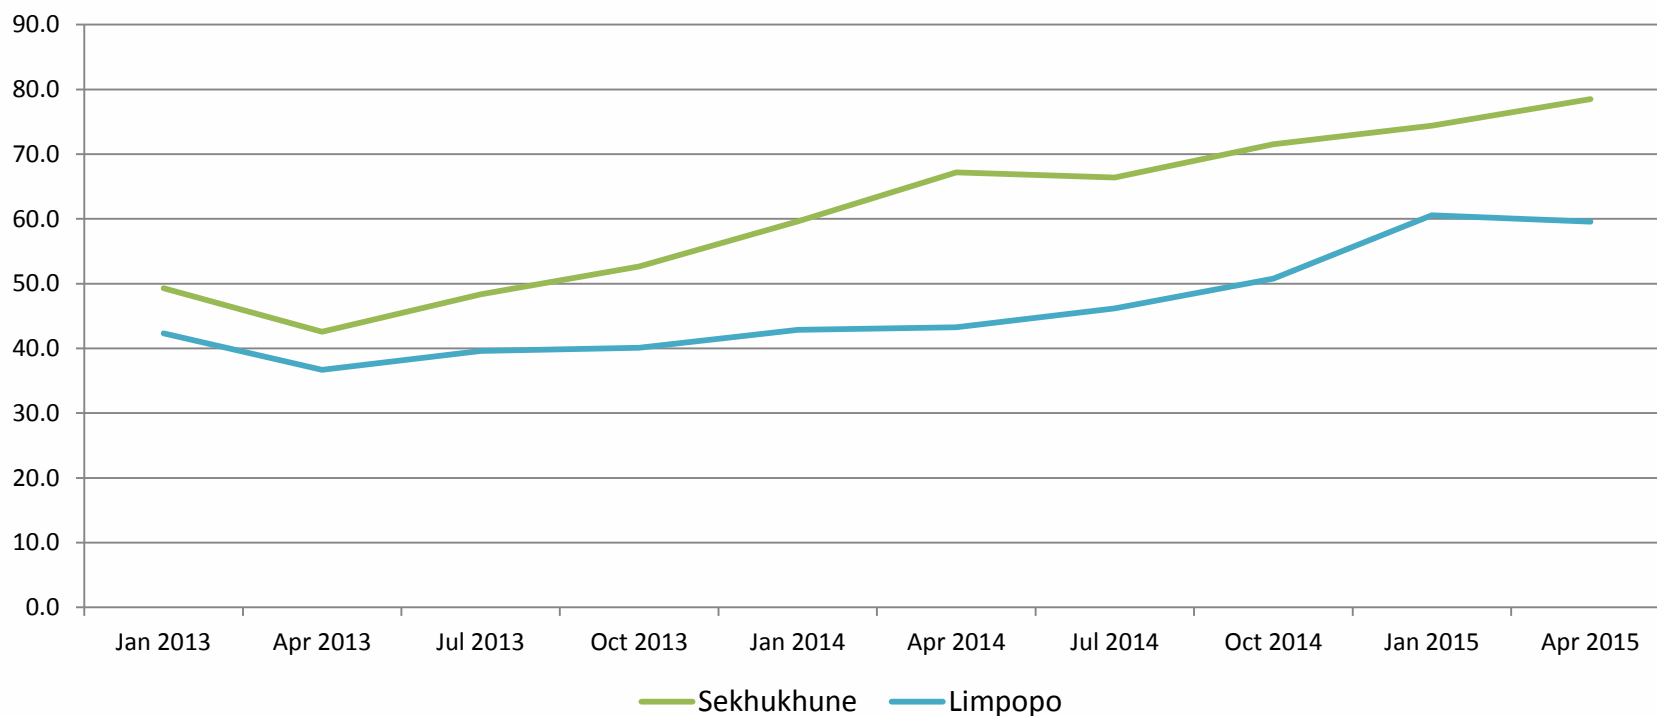

Phase 1: HCT Action Dashboard

Priority Action	Expected Outcome	Responsible	By When	STATUS	COMMENTS
Distribute standardized data collection tools	All HCT providers use standard DOH tools	Ms Ramokotjo	31-Jul-15		
Link CBO/NGOs providing HCT with facilities	CBOs/NGOs providing HCT report data to identified facilities	Ms Ramokotjo	31-Jul-15		
Capture back log of community HCT data for 1 st quarter 2015	All community HCT data incorporated into identified facility data	Ms Ramokotjo	31-Jul-15		
Develop a data verification tool for facilities and sub-districts	Data verification tool available for verifying data at all levels	Ms Sally Smith	31-Jul-15		Tool developed for facilities, still to be put in practice. Sub-district tool outstanding
Map HCT providers and allocate these to identified wards/communities	Identified HCT and TB providers servicing specific areas of the community	Me Ramokotjo	31-Jul		
Implement ICRM and down refer stable patients	Facility personnel have more time for TB patients	Mr Motlounge	31-Dec-15		most facilities implementing ICRM

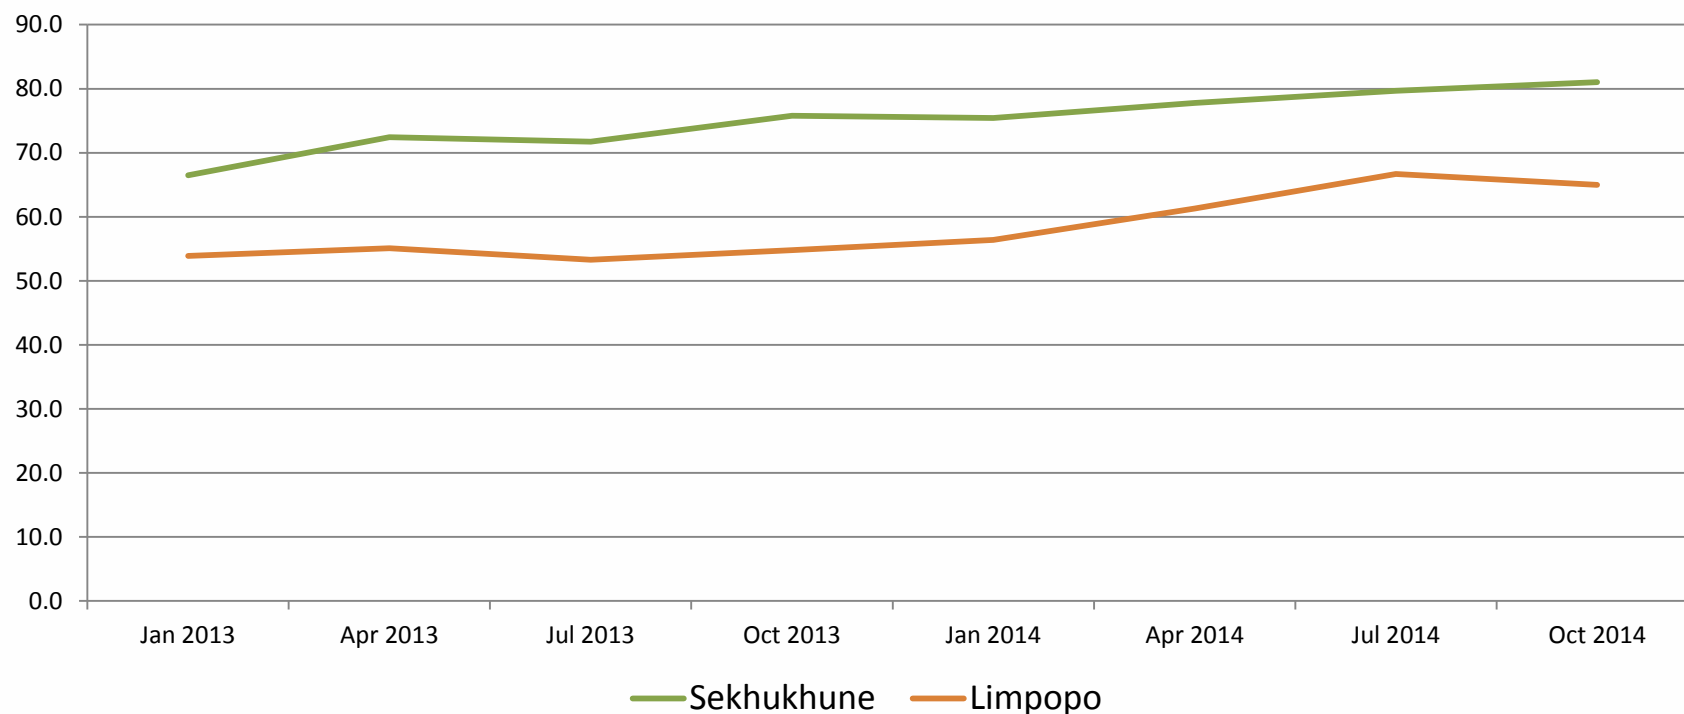

Limpopo: Adult Viral Load Completion @ 6 Months

Adult with Viral load completion rate at 6 months

Limpopo: Adult Viral Load Completion @ 12 Months

Adult with Viral load completion rate at 12 months

Limpopo: Remedial Actions

Approach branded “road shows”

Step 1

- Each facility presented on performance on VL completion rate

Step 2

- In-house training on cohort data analysis and file audits

Step 3

- Best practice sharing among facilities

90 × 90 × 90
